

## FIA FORMULA E WORLD CHAMPIONSHIP ROUND 1 - SAO PAULO E-PRIX 4 - 6 DECEMBER 2025

**From:** The Stewards  
**To:** All competitors and drivers

**Bulletin no. 1**  
**Date:** 4 December 2025  
**Time:** 15:35

The Stewards inform all Competitors

1) **Timetable version number 2** is valid.

2) The **extrication exercise** will take place in the respective Team garage on Friday 5 December 2025. The Drivers will be required to perform also a SWITCH OFF AND RED CAR RESET test and be able to follow the procedures needed to reset the car from the driver's position.

**19.00 hrs** – N°3 - Josep Maria MARTÍ / Cupra Kiro

**19.30 hrs** – N°28 - Felipe DRUGOVICH / Andretti Formula E

One set of tyres must be kept out of the Parc Fermé and be delivered to the Tyre Parc Fermé within the next 15 minutes after the exercise is concluded for your driver.

3) The **time penalty conversion** for penalties imposed during the last two laps or after the end of the race in accordance with **Article 16.3** will be as follows:

The time penalty will be as follows:

Drive Through 15 Seconds

10 second Stop and Go 30 Seconds

4) The **summary of mandatory media activities** is attached for your information.

5) The attached **Hankook Tire Spec & Allocation & Minimum tire pressure measurement** is valid for the 2025-2026 FIA Formula E World Championship - Sao Paulo E-Prix.

6) The following list of **User Manual / Guide from FIA Suppliers** is valid for the 2025-2026 FIA Formula E World Championship - Sao Paulo E-Prix:

## FE S12 Sao Paulo – Tire Spec & Allocation

- Race event : FIA Formula E S12 Rd1 Sao Paulo
- Date : December 3<sup>rd</sup> – 6<sup>th</sup> 2025
- Tire Spec

Tire specification	Front axle	Rear axle
Name of product	Hankook ION Gen3.5 Evo	
Size	255/40R18	315/40R18
Optimum Rim Width	10 J	12 J
Minimum Tire Pressure	1.20 bar	1.20 bar
Maximum Tire Pressure	2.70 bar	2.70 bar
Maximum camber	-4.0 °	-4.0 °
Minimum camber	0.0 °	0.0 °

- Minimum tire pressure: Tire pressure is measured from the beginning of the session when the wheels are fitted to the vehicle until the end of the session + within the first 30 minutes of the parc ferme.
- Maximum tire pressure : Tire pressure, measured at every Pit Out AND until a first valid measurement has been received from the TPMS sensor during SKD, FP, and Q sessions, must not exceed the values specified in the chart. For races, the maximum pressure is measured just before the start of the race when the car is moving to its grid position (AND until a first valid measurement has been received from the TPMS sensor) and at Pit Out (AND until a first valid measurement has been received from the TPMS sensor) only if an intervention has been made on the tire.

- Tire Allocation for the Sao Paulo round will be 2 sets of new tires per race number. (4ea Front, 4ea Rear tires)

Tire Parc Ferme	Open	Close
Thursday (December 4th_Prep of the Event)	14:00	17:00
Friday (December 5th)	07:30	18:25
Saturday (December 6th)	06:45	All tires must be return after race

- *On Thursday 1 Set of Tires per car available for photo(Not in parc ferme) : 16:30 - 18:15*

The **Pressure measurement** is done at any time and in real-time when the car is running using the provide common TPMS system supplied by the appointed FIA Tire supplier – Hankook.

The TPMS system is providing an absolute pressure measurement.

To calculate the relative pressure, and check the pressure is above the minimum threshold, the competitor needs to subtract the current atmospheric pressure provided by the official timekeeper.

This Atmospheric pressure can be read

- On the weather page of the official timing TV screen
- On the V2 protocol from the official timing system
- It is sent in live to the car when running on a track, using the transponder loops. The official atmospheric pressure is received on the message 0xCA when the car is going over a timing loop.

The reference measurement is then given by : **Tire pressure = TPMS sensor reading – official atmospheric pressure from timekeeper.**
